Our Goal

Make a unique mobile app for Sri Lankans who want to sell their car and buy a car easily, quickly, and with more safety. We will develop our business idea to make the car dock app the most reliable and user-friendly one and only car selling/buying app in Sri Lanka.

Let's talk about SWOT Annalysis.

Strengths

We are the firsts who give priorities to sell & buy cars in sri lanka. so we can give customers more user friendly interfaces and facilities to buy and sell cars. our unique selling point is customer satisfaction.

Weaknesses

there are some treanding companies that selling and buying cars but we focus only car selling and buying and we will do more than them to impress our customer.

Opportunities

There are lot changes in technology, policies, and we are hope to go with social patterns and it can be a growth opportunity for our CarDock mobile app.

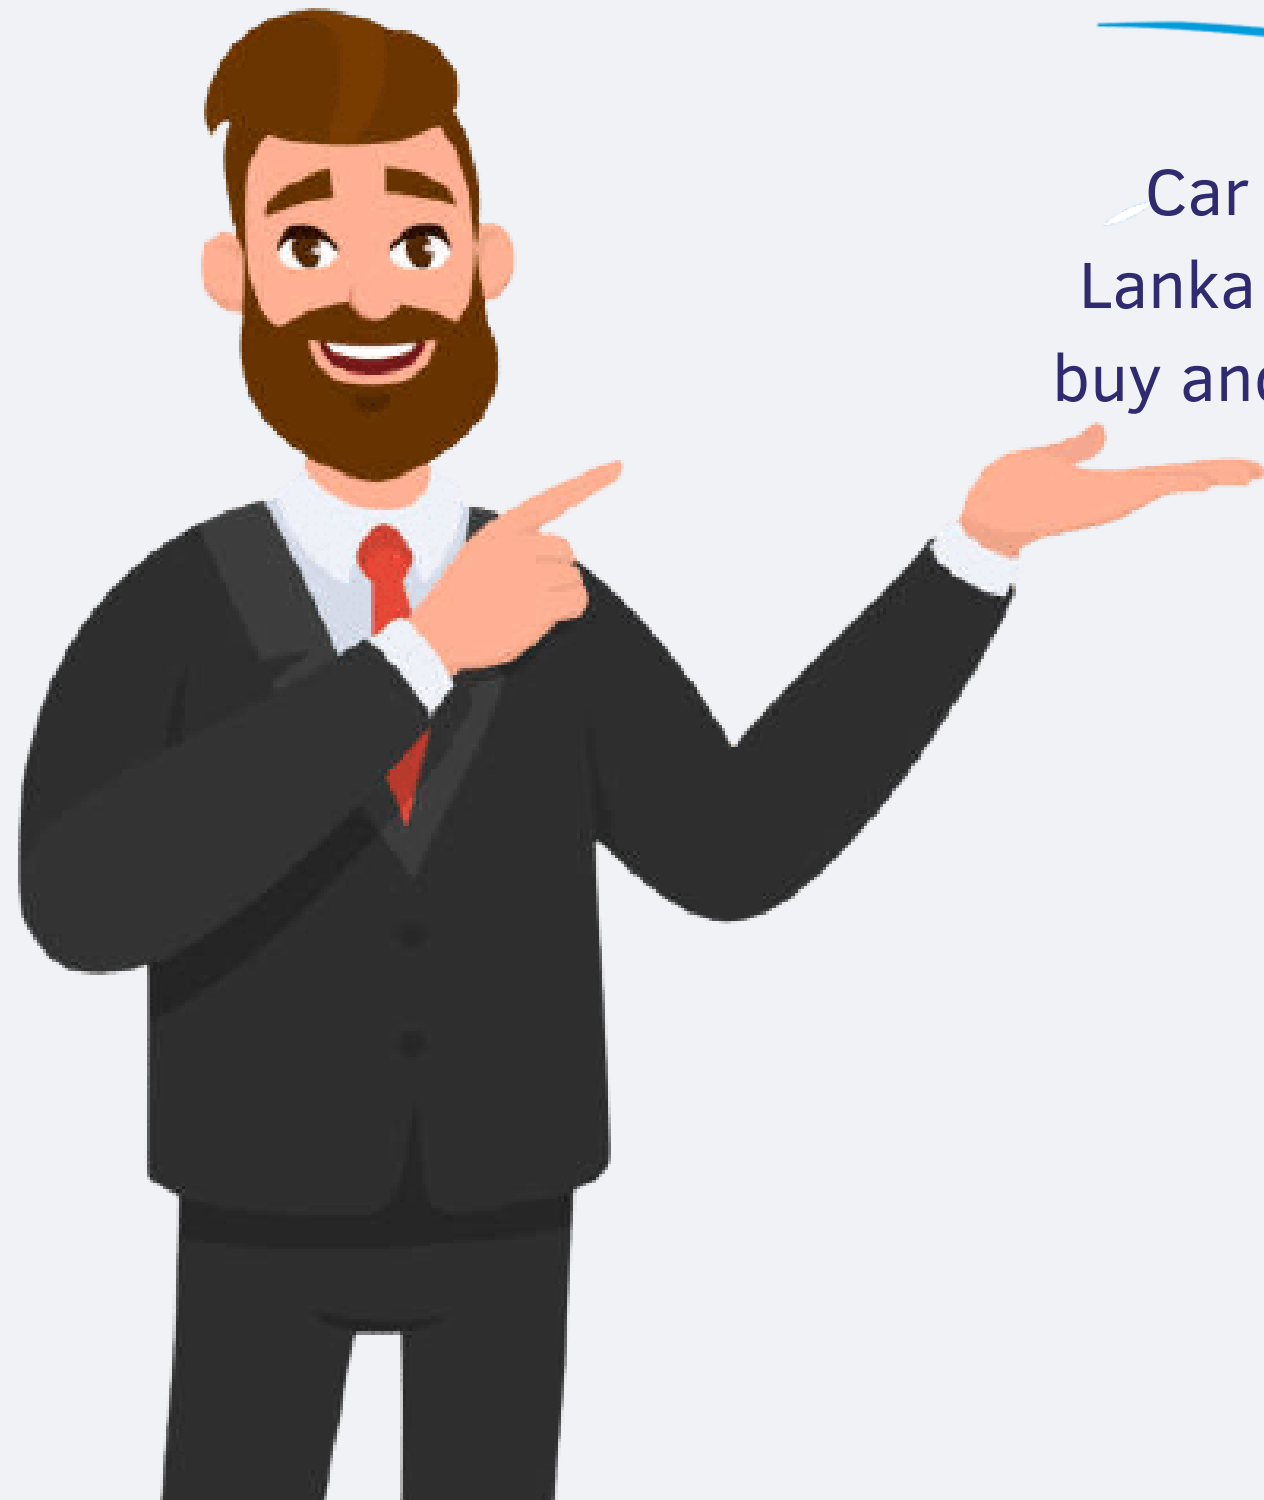

Threats

As the threat those days there are more cyber criminals in our country and the world so we have to improve our security and give customer very reliable app and lot of funclaities though app.

Why Choose Us

Car Dock is a very unique app that helps users to find a new or used car in Sri Lanka and sell user's own cars very easily to customers via this app. we hope to buy and sell only cars because then we can give customers to a good experience with cars and it is very helpful for customers to work with our app.

Functionalities

Search Cars

you can filter with the model, manufacturer year, fuel type, millage, brand new or used, etc. it is a fast and good user experience to the user.

Maintain Wishlist

Buyers can maintain wishlists and save cars for watch later likewise. also, sellers can view how many wishlists include his own car.

User Like System to ads

we implement a new strategy to give like to seller's ads and it is good for a seller that his request is acceptable for both seller and buyers.

Car Registration

we recommend all sellers add four photos of the front, rear, interior and side of your car and it is good for buyers to see the car further there are compulsory field to fill in the car register view.

User Registration

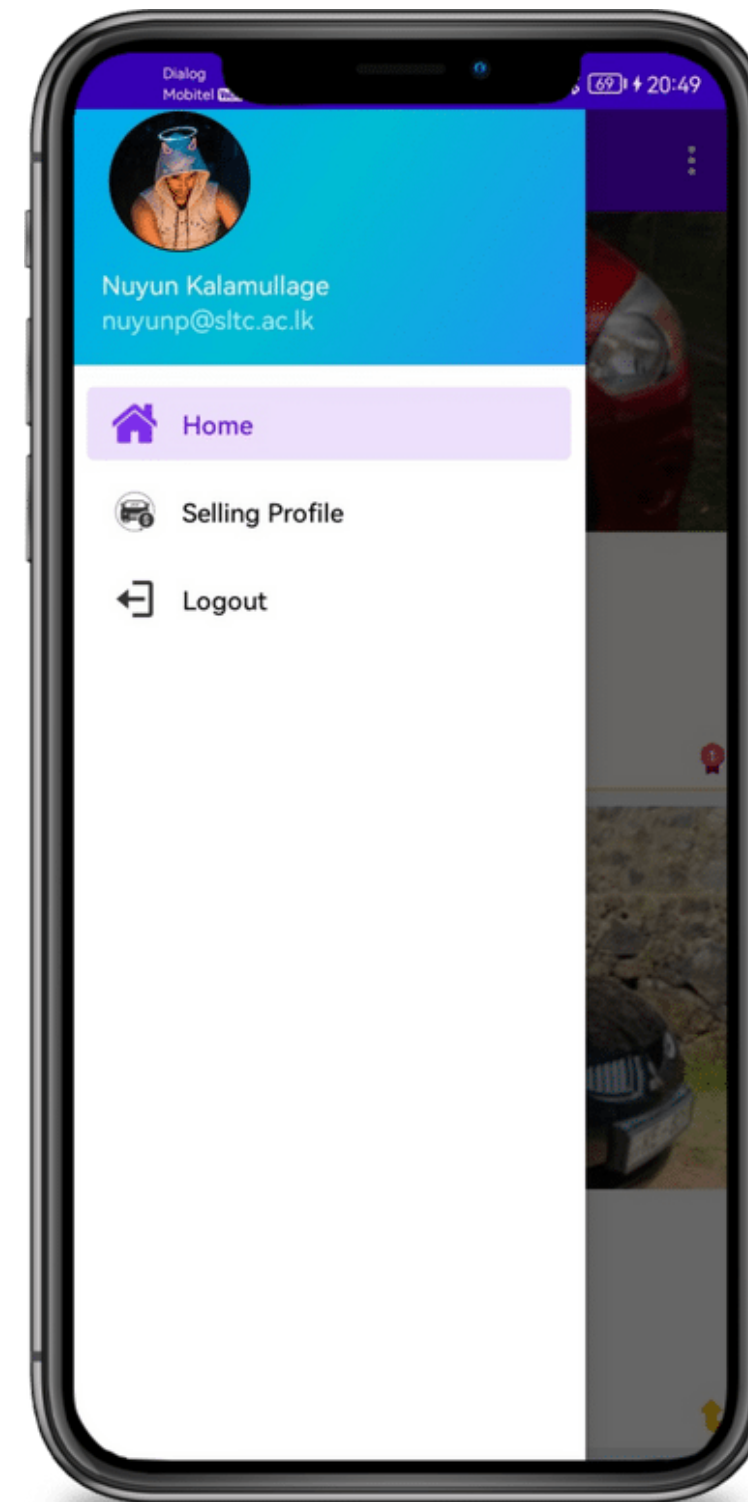

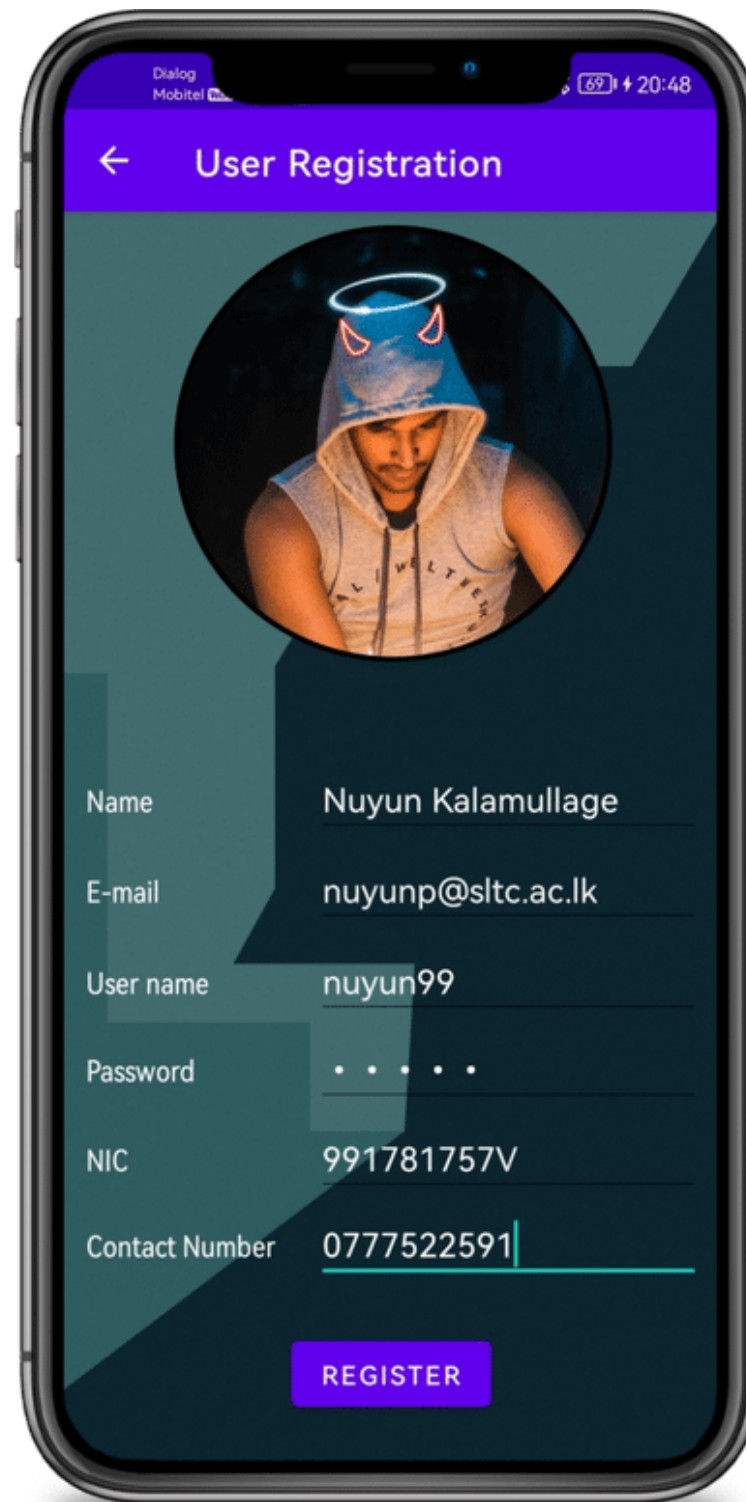

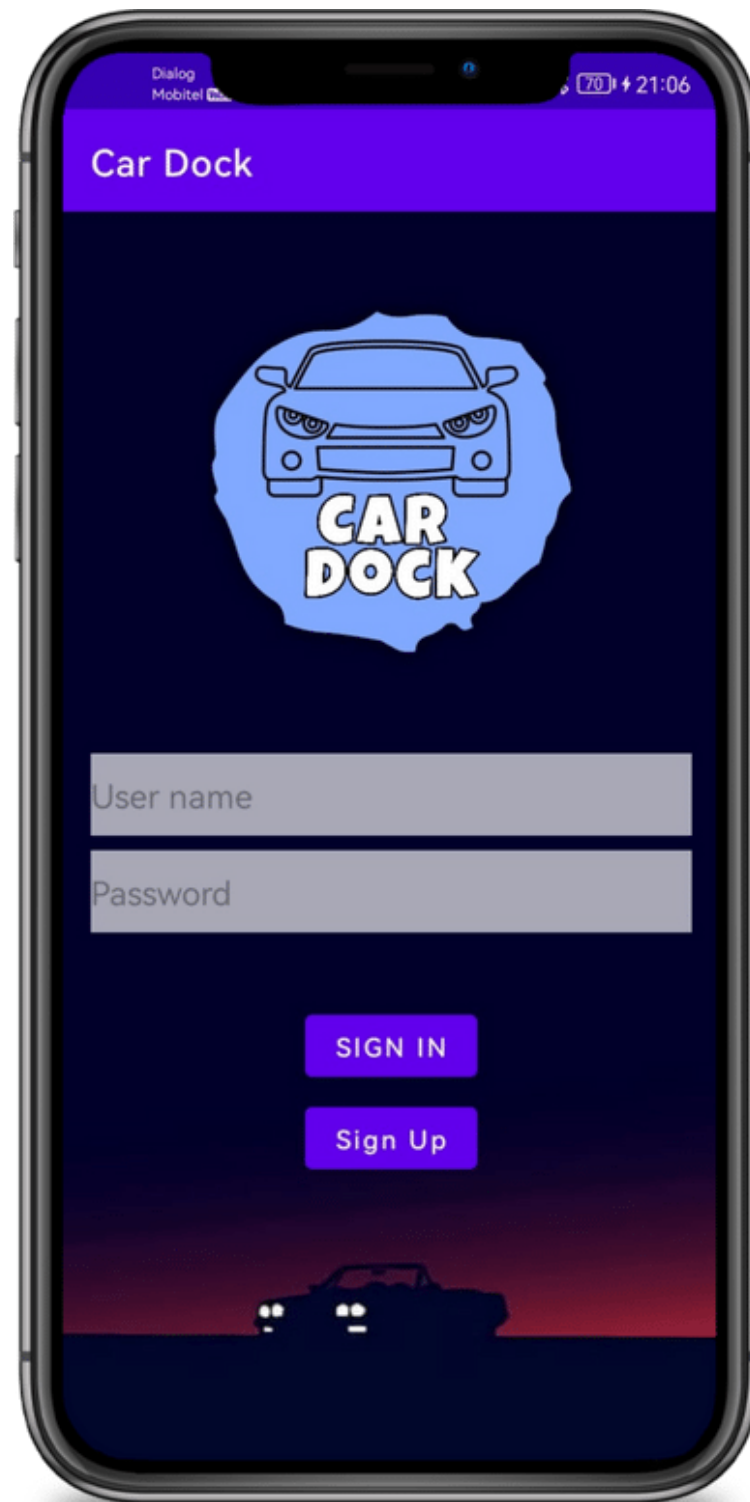

This is the most common view of any app. further we have to recognize the user is a valid user so we recognized it through mobile verification and email verification. but in selling process we check both buyer and seller NIC cards.

In app Payments

we Implementing an in-app payment system and loan system in our app with verified banks in sri lanka.

How My App Looks Like

**THANK
YOU!**

Have a
great day
ahead.
